Suraj Yadav

Frontend Developer(React)

PROFESSIONAL SUMMARY

A versatile Front End Developer intern proficient in HTML, CSS, and JavaScript, adept at dynamic web development. Demonstrates collaborative competence, showcasing expertise in Tailwind CSS and Bootstrap for impactful user experiences. Adaptability and a rapid grasp of emerging technologies, including Chakra UI, React, and React Router, are distinguishing attributes.

PROJECTS

1. Movie Search Bar Using OMDB API | ⊕ | ◉
HTML | CSS | Git | JavaScript

- Crafted an engaging Movie Search Bar with user-friendly navigation and interactive elements.
- Ensured seamless viewing across various devices, providing an optimal experience on desktops, tablets, and smartphones.
- Incorporated sleek animations and visually appealing elements to captivate users and highlight superhero skills and achievements.
- Customized superhero details, including powers, skills, and achievements, to create a unique and personalized experience for visitors.

2. Envoy clone | ⊕ | ◉
HTML | CSS | JavaScript | Git

- Contributed to Envoy, enhancing visitor management with features like sliders, login/signup, and styling using HTML5, CSS3, JS, and GIT. Completed in 8 days.
- Successfully developed and implemented features independently, completing the project in 8 days.
- Utilized HTML5 for structure, CSS3 for styling, and JavaScript for dynamic functionality, enhancing the project's versatility.

3. Walmart Clone | ⊕ | ◉
React | Tailwind CSS | Chakra UI | React Router

- Developed a Walmart clone website using React.js, Tailwind CSS, Chakra UI, and React Router.
- Implemented a responsive design that provides optimal user experience across different devices and browsers.
- Integrated frontend components with server-side APIs to fetch and display product data.
- Optimized the website for speed, performance, and scalability, ensuring fast loading times and smooth navigation.
- Conducted thorough testing and debugging to ensure the reliability and stability of the application.
